Session 4 — App Icon Overhaul

May 22, 2026

Replaced the koi app icon with a new borderless leaping koi design so iOS rounds the corners cleanly. Versioned all icon filenames to bust iOS home-screen icon cache, and cleaned up legacy icon files.

App-icon asset structure added

Commit: 20b0635b

- Created /assets/icons/ folder with master 1024px PNG + README.
- Placeholder for Japanese-themed icon variant.

Regenerated all web icons from new koi master

Commit: ee815389

- Produced 180/192/512/1024px sizes from the updated master icon.

Icon filenames versioned (-v2) to bust iOS cache

Commit: d2817e89

- iOS caches home-screen icons aggressively; renaming the file forces a refresh.

New icon: borderless leaping koi

Commit: 267c0c37

- Removed the rounded plate from the icon art — iOS adds its own rounded corners.
- reminders.js updated to reference the v3 icon.

Cleanup: removed orphaned legacy icon files

Commit: d5d9175f

- Deleted old icon-*.png files that were no longer referenced anywhere.
