

Tank Care Buddy

Session 5 — PWA Fixes, Scroll Drift & Chemical Verify Flow

May 28–29, 2026

Fixed several bugs discovered when installing the app as a PWA on iPhone: the icon path was wrong under the `/my-tanks/` subpath, horizontal scroll drift was causing the screen to slide sideways, and the chemical verify flow was rebuilt to be more reliable.

Repository: [jtsmith7234-rgb/my-tanks](https://github.com/jtsmith7234-rgb/my-tanks)

Update (general fixes)

Commit: [e594c734](#)

- Miscellaneous fixes and cleanup pushed directly.

Web icon path fixed for `/my-tanks/` subpath

Commit: [a9bf0b36](#)

- PWA icon was 404-ing when installed from the GitHub Pages URL.
- Changed to a single `/apple-touch-icon.png` at the repo root.

Horizontal drift — first fix attempt

Commit: [ccdb4943](#)

- Added window-level touchend safety net.
- Added `overscroll-x:contain` to the main container.

Horizontal drift — real fix

Commit: [9f44ef6c](#)

- Found the true root cause: unclamped `scrollLeft` on `#main + document`.
- Clamped both; drift eliminated.

Per-tank guided setup opt-in

Commit: [175ae6e6](#)

- Guided setup is now per-tank, not a global on/off switch.
- Removed the global help-prompt off switch.

PWA/Safari icon path fixed under subpath

Commit: 001d3603

- Follow-up fix ensuring the icon resolves correctly under `/my-tanks/`.

Chemical verify flow rebuilt

Commit: e15b904f

- Prompt appears when you add a chemical product.
- Verified state is now persisted so you don't have to re-confirm every session.
