

Tank Care Buddy

Session 6 — Themes v2, Species Compatibility & Onboarding

May 30, 2026

Major session: rebuilt the theme system with three distinct dynamic backgrounds (Midnight Reef, Tropical Pop, Planted Freshwater), added a species compatibility helper, redesigned the settings sheet, cleaned up the header, and added a beginner onboarding tutorial.

Repository: [jtsmith7234-rgb/my-tanks](https://github.com/jtsmith7234-rgb/my-tanks)

Uniform tank cards, removed stray colored silhouettes

Commit: 6521b8de

- Tank cards now have a consistent look — no more random colored fish silhouettes.

Streamlined header

Commit: a7c1eed2

- Settings gear icon moved to the left.
- App title centered.
- Add (+) button on the right.

Settings sheet added with gear icon

Commit: ce3745c8

- Clean bottom-sheet settings panel accessible from the header gear icon.

Tropical Pop set as default theme

Commit: 6bcccfaf

- Tropical Pop is now the theme new users see on first open.

Three global themes with distinct dynamic backgrounds

Commit: 456b2a66

- Midnight Reef: deep dark ocean feel.
- Tropical Pop: bright, colorful freshwater.
- Planted Freshwater: lush green planted tank.
- Each theme has a different animated/dynamic background.

Give each theme a distinct dynamic background; restore Koi

Commit: 483af4a5

- Each theme's background is now visually distinct.
- Koi theme restored as a fourth option.

Planted background: Vallisneria tape grass

Commit: 9550222

- Planted theme background updated to look like Vallisneria (tape grass) in the background.

Refined Planted and Koi themes

Commit: e875db28

- Planted: broad-leaf plant aesthetic.
- Koi: zen lily-pad pond feel.

CSS cache version bumped for theme styles

Commit: 8cbd9b54

- Forced a cache refresh so the updated theme CSS loads immediately.

Koi theme reimagined as dark zen pond

Commit: 8cbd9b54

- Multiple iterations refining the Koi theme toward a darker, more zen aesthetic.

Koi theme removed; saved value falls back to Tropical Pop

Commit: 5e432688

- Koi was removed from the theme picker after multiple unsatisfying iterations.
- Users who had Koi selected are automatically moved to Tropical Pop.

Midnight Reef renamed to The Deep

Commit: 3b5534d4

- Theme name change only — appearance unchanged.

Species compatibility helper + expanded fish database

Commit: a784ba1d

- You can now search two species and see if they're compatible.
- Freshwater species database significantly expanded.
- Population suggestion dropdown added.

Population suggestion dropdown no longer clipped

Commit: 6ecc971a

- The dropdown was being cut off by overflow:hidden — fixed.

Beginner onboarding: Tutorial + Settings Help

Commit: afa6e09b

- First-run tutorial walks new users through the app.
- Settings > Tutorial/Help section added for users to revisit guidance.
