

Tank Care Buddy

Session 7A — Fish Tab Unification & Settings Cleanup

June 7, 2026

Cleaned up the Fish tab inside each tank: merged the two-tab layout (Check fit / Browse species) into one unified section. Also cleaned up the Settings help cards by removing misleading action buttons.

Unified fish tab + Settings help card cleanup

Commit: 302c3220

- Fish tab: removed the two-tab seg control (Check fit / Browse species).
- Replaced with a single 'Browse species & compatibility' section.
- Both compat search and full browse list are always visible.
- 'Add to tank' button appears on each species card — skips the tank picker.
- Settings help cards: removed action buttons that were confusing out of context.
- Species Compatibility card renamed to 'Species Compatibility Browser'.
- Button now navigates to the home species browser screen.

Single search input for Browse + Compatibility

Commit: 4ceea761

- Removed the second 'Browse all species' search box.
- One input now drives both the browse list filter and the compatibility badge.
- Placeholder text updated to 'Search or browse species'.
