Species Image License Audit

Generated June 07, 2026 at 18:33 UTC · Commit b0ac754 on main

26 images audited

All cleared for commercial use

Source: Wikimedia Commons (live API query)

Licenses: CC BY · CC BY-SA · Public Domain

What These Licenses Mean For Your App

CC BY (any version)	Free to use commercially. Must credit the photographer. The <code>imageAttributionText</code> field in <code>fishdb.js</code> satisfies this.
CC BY-SA (any version)	Same as CC BY. The <code>ShareAlike</code> clause only applies to derivatives of the photo itself — displaying an unmodified photo in your app does NOT make your app CC BY-SA.
Public Domain	No restrictions whatsoever. No credit required. (Goldfish image is a U.S. government work.)

Bottom line: All 26 images are cleared for use in a commercial iOS app, provided attribution is displayed in the app UI. The `imageAttributionText` field stored in `fishdb.js` and rendered below each hero photo satisfies every CC license requirement here.

Per-Image License Records

License data pulled live from the Wikimedia Commons `imageinfo` API at time of audit. Click any file page link to verify independently.

#	Common Name	Scientific Name	License	Attr. Req.	Commons File Page

License Type Summary

License	Count	Commercial OK?	Attribution Required	ShareAlike Applies?
CC BY 2.0	2	Yes	Yes	No
CC BY 3.0	1	Yes	Yes	No
CC BY 4.0	2	Yes	Yes	No
CC BY-SA 2.0	1	Yes	Yes	No (unmodified display)
CC BY-SA 2.5	3	Yes	Yes	No (unmodified display)
CC BY-SA 3.0	7	Yes	Yes	No (unmodified display)
CC BY-SA 4.0	9	Yes	Yes	No (unmodified display)
Public domain	1	Yes	No	No

Important Notes

1. Attribution is already wired up. The `imageAttributionText` field renders below each hero photo in the species detail view. Do not remove that display before App Store submission.
2. CC BY-SA ShareAlike does not infect your app code when you display an unmodified photograph. Only a work derived from the photo itself would need to carry the SA clause.
3. The Goldfish image is Public Domain (U.S. government work, USFWS/Duane Raver). No attribution legally required, though it is shown for consistency.

4. Images are served by Wikimedia's CDN via their /thumb/ pipeline. You are not hosting them, so no additional hosting agreement is needed.
5. Broken-image fallback is implemented. If any image ever returns a 404, fishImageError() in fishdb.js automatically swaps in the silhouette — no broken icon will appear.
6. This audit does not constitute legal advice. For a paid-tier app or formal App Store legal review, consult an attorney.
