

Session Summary

Capacitor 6 iOS wrap for Tank Care Buddy. Scaffolded the full Xcode project, synced web assets, audited iOS shell concerns, and applied 4 targeted fixes. Project is ready to open in Xcode for device testing. CocoaPods must be run on your Mac before opening Xcode (see next steps).

Capacitor Commands Run

```
npm install --save-dev @capacitor/cli@6
npm install @capacitor/core@6 @capacitor/ios@6
npx cap init "Tank Care Buddy" "com.tankcarebuddy.app" --web-dir "www"
npx cap add ios
npx cap sync ios (run twice – initial + post-fix)
```

Config Values

Key	Value	Reason
appId	com.tankcarebuddy.app	App Store Connect bundle ID
webDir	www	Required subfolder — Capacitor rejects '.'
ios.contentInset	always	Forces WKWebView safe area respect
ios.scrollEnabled	false	App manages its own scroll; prevents double-scroll
ios.backgroundColor	#06121a	Matches dark background for smooth launch transition
Deployment target	iOS 13.0	Capacitor default; covers ~99% active iPhones
Marketing version	1.0	Set in pbxproj

Files Created

File	Description
package.json	Node project manifest (required for npm/Capacitor)
capacitor.config.json	Capacitor config with iOS settings
www/	Build output folder — all web assets for Capacitor sync
ios/	Full Xcode project scaffold generated by Capacitor
ios/App/App.xcworkspace	Open this in Xcode (not .xcodeproj)

ios/App/App/Info.plist	iOS app config — modified (see fixes)
ios/App/Podfile	CocoaPods dependency file
ios/App/App/public/	Web assets synced into native Xcode project
tests/2026-06-12-b-capacitor-wrap-report.md	Full Capacitor wrap QA report

Files Changed

File	Change
styles.css	.input.tiny font-size 13px -> 16px (iOS keyboard zoom prevention)
index.html	Added format-detection meta tag; version bumped to v20260612b
ios/App/App/Info.plist	Portrait-only orientation; UIStatusBarStyle added; privacy usage strings added
.gitignore	Added node_modules/, www/, ios/App/App/public/, Pods/, build artifacts

iOS Shell Audit — Issues Found & Fixed

ID	Sev	Issue	Fix	Status
W-1	Medium	.input.tiny font-size was 13px — triggers iOS keyboard zoom on focus	font-size: 16px in styles.css	FIXED
W-2	Medium	Info.plist allowed landscape orientations — exposes layout issues	Locked to portrait-only in Info.plist	FIXED
W-3	Low	No UIStatusBarStyle key — native status bar appearance undefined	Added UIStatusBarStyleDefault to Info.plist	FIXED
W-4	Low	No format-detection meta — iOS might auto-link numbers in parameter displays	Added meta format-detection tag to index.html	FIXED

Known Remaining Items (non-blocking)

ID	Description	Timing
R-1	Google Fonts CDN — falls back to SF Pro with no internet. Visually acceptable. Bundle fonts locally for full offline support.	Post-MVP
R-2	No @capacitor/status-bar plugin — status bar style is static. Add for theme-aware dynamic control.	Post-MVP
R-3	No @capacitor/splash-screen plugin — instant launch (duration 0). Fine for now.	Post-MVP
R-4	reminders.js uses web Notifications API. For lock-screen push, add @capacitor/local-notifications in notification phase.	Notification phase
R-5	CocoaPods not in sandbox — pod install was skipped. MUST run on Mac before opening Xcode.	Required — Mac only

Exact Next Steps — Xcode / Device

Step	Action	Type
1	On your Mac: <code>cd ~/path/to/tank-care-buddy/ios/App</code>	Required
2	Run: <code>pod install</code> (installs CocoaPods dependencies)	Required
3	Open: open <code>App.xcworkspace</code> (use workspace, NOT <code>.xcodeproj</code>)	Required
4	In Xcode: Signing & Capabilities -> Team -> select your Apple ID	Required
5	Confirm bundle ID: <code>com.tankcarebuddy.app</code>	Verify
6	Select iPhone 15 Pro simulator or plug in device, press Run	Test
7	Test: open tank, switch tabs, open/close modals, check bottom safe area	Validate
8	If status bar text is invisible on dark theme: change <code>UIStatusBarStyle</code> to <code>UIStatusBarStyleLightContent</code>	If needed

READY FOR
XCODE

`pod install` on Mac -> open `App.xcworkspace` -> sign -> run. After successful device test, proceed to App Store Connect / TestFlight phase.
